

WEEK 3 – CREATING AN INCLUSIVE SCHOOL
VIDEO STEP TRANSCRIPT – CREATING AN INCLUSIVE SCHOOL

You are welcomed to the third week of the course. This week we focus on how schools become inclusive, exploring support systems within the school to support this transition. The relevance of involving all aspects of the school community and methods of facilitating this shift to inclusion is discussed, supported by samples of good practise.

It is important to realise that inclusion does not end with the teacher and the school. It goes from the school leadership and management down to the admin team and the support team as well. Every aspect of the school community should be trained and ready to support inclusion. So in this discussion, we look at the level of the school, keeping in mind the rights of the child and the support of families. This week will be facilitated by Vanessa.
