SDG Target 16.10

“Ensure public access to information & protect fundamental freedoms, in accordance with national legislation & international agreements”

Researchers dilemma!

I need to purchase access!

The screenshot shows a web browser window with multiple tabs. The active tab is the ScienceDirect article page. The browser's address bar shows the URL: `sciencedirect.com/science/article/pii/S1871678417301966?via%3Dihub`. The ScienceDirect logo is in the top left, and navigation options like 'Journals & Books', 'Register', and 'Sign in' are in the top right. Below the logo, there are buttons for 'Get Access', 'Share', and 'Export', along with a search bar and an 'Advanced' search option. The article title is 'Guiding recombinant antivenom development by omics technologies' by Andreas H. Laustsen. It is a review article in 'New Biotechnology', Volume 45, published on 25 October 2018, pages 19-27. The article is part of a special issue 'Affinity Proteomics 2017' edited by Mike Taussig. The page includes a table of contents on the left, a 'Highlights' section, and a list of other articles from the issue on the right. The right sidebar contains links to 'Purchase PDF' and 'View details' for several related articles. At the bottom, there is a Windows taskbar with various application icons and a system tray showing the time as 9:53 AM on 30/11/2019.

Abstract: Snakes, scorpions, and spiders are venomous animals that pose a threat to human health, and severe envenomings from the bites or stings of these animals must be treated with antivenom. Current antivenoms are based on plasma-derived immunoglobulins or immunoglobulin fragments from hyper-immunized animals. Although these medicines have been life-saving for more than 120 years, opportunities to improve envenoming therapy exist. In the later decades,

BUT!
