DISABILITY, DIVERSITY AND  
INCLUSION** UNIVERSITY OF  
CAPE TOWN

**WEEK 6 – BUILDING NETWORKS  
VIDEO STEP TRANSCRIPT – BUILDING NETWORKS**

Hello everyone, and welcome to the final week of this course. This week we consolidate all that we have covered in the course and reflect on our own learning. What is the way forward? How do we bring all this together to begin to understand what our possible roles might be?

As Roy said previously, we do and should not have to do it alone. Inclusion is about the society as a whole, not the individual. There is a need to build up a community of practice and connect to people who can be involved directly or indirectly and help facilitate the goals of inclusion.

Community of practice is about people coming together to work on something they have a similar interest for, like when people become interested in making schools inclusive. We discuss and focus on that this week, as your wrap-up.
